

## QINEO Micro Pulse 200 C

**Portable MIG/MAG welding power source up to 200 ampere for manual welding**

The portable, infinitely adjustable MIG/MAG welding machines QINEO Micro are easy to handle, flexible in use and powerful in performance. The synergy-based welding machines are designed for precision work with high-quality results. You will be impressed by the optimum power and weight ratio of the QINEO Micro. The handy welding power sources can be quickly and easily installed by the welder on any welding or construction site, when repairing vehicles or for industrial use.

- Versatile applications: A solution for all welding tasks
- Synergy mode: Quick setting of the welding parameters
- Easy to use: Synergy characteristic curves are included in the delivery
- Optimum power and weight ratio Light, easy to use and very powerful
- Robust construction: High level of stability of the devices

## QINEO Micro Pulse 200 C

### Technical Data

|                                |                               |
|--------------------------------|-------------------------------|
| Construction form              | Portable, internal wire drive |
| Welding current                | 5 A - 200 A                   |
| Welding current 100% duty cycl | 140 A                         |
| Open circuit voltage           | 65 V                          |
| Mains voltage                  | 230 V                         |
| Connection cable               | 3 x 2,5 mm <sup>2</sup>       |
| Mains protection/230V          | 25 A - 230 V                  |
| Type of protection             | IP 23 S                       |
| Insulation class               | H                             |
| Type of cooling                | F                             |
| Dimensions (L/W/H) compact uni | 500 x 280 x 420 mm            |
| Weight compact unit            | 17 kg                         |

### Application

Manual

### Process

- MIG/MAG singel wire Pulse
- MIG/MAG singel wire
